& AFRICA

Job Title: Junior Content Protection Analyst

Department: Global Content Protection - Motion Picture Association

Location: Brussels, Belgium

Role Description: Reports to the Regional Director Content Protection, EMEA

The Motion Picture Association (MPA) is a trade association representing the six major American film studios. Its content protection department is charged with protecting the film, video and television products of its members against illegal duplication, distribution and sale.

The MPA's Europe, Middle East and Africa Headquarters, based in Brussels, is currently looking for a "Junior Internet Analyst, Content Protection" with a wide variety of skillsets, backgrounds and experiences. This operational role is primarily analytical and investigative contributing to our Worldwide Content Protection Program, focusing on the EMEA region. The position reports to the Regional Director Content Protection, EMEA.

Candidates must be self-starters with a demonstrated ability to work independently and as part of a team, to deliver professional results on short deadlines, amidst shifting priorities while remaining poised. They should also be detail-oriented, and able to communicate effectively in English, orally and in writing. Advanced work ethic and creative problem-solving skills including the ability to work well with minimal supervision and guidance are essential.

We require a team player who has the utmost moral and ethical character to support the department as well as the global team to implement sound strategies that will benefit the motion picture industry today and for the future.

Key Responsibilities

- Assist the Global Content Protection team in contributing to and executing a global Internet strategy, including the identification of high impact operations.
- Identify relevant Internet targets by analyzing data sets and investigating online.
- Prepare country target landscapes and reports based on your data analysis.
- Condense large data sets into readable reports and concise statistics that can assist in the content protection efforts of the MPA.
- Monitor the piracy landscape for trends and changes.
- Provide administrative assistance to the EMEA content protection team regarding ongoing enforcement efforts.
- Conducting outreach with intermediaries in the online sphere.
- Assist the team as necessary in ongoing content protection strategies.

The Ideal Candidate

- Preferably a bachelor's degree in Computer Science, Computer Forensics, Data Science or equivalent in experience.
- Strong analytical & organization skills with attention to detail.
- Has a basic understanding of the Internet ecosystem, anti-piracy, and copyright infringement issues.
- Knowledge of the relationships between ISPs, domain names, WHOIS, IP addresses, hosting providers, and internet governance overall.
- Has above average computer skills and fluency in all core MS software products.
- Ability to communicate with users of all levels of experience; to work creatively, quickly, and effectively to produce results amidst shifting priorities while remaining poised.
- Has creative problem-solving skills including the ability to work well with minimal supervision and guidance.
- Must possess the highest level of work ethic and integrity, with the ability to maintain confidential information.
- Has experience with online collaboration tools.
- The role requires fluency in English. Other languages are a plus.

We Offer

- Training opportunities
- Competitive salary
- Extra-legal benefits

Applicants must be legally authorized to work in Belgium.

Please send your CV along with a Cover Letter outlining your qualifications for this role to emeacareers@motionpictures.org with "Junior Content Protection Analyst " included in the subject line.
